Please provide a detailed description of the items listed in the budget

The following requests are listed in the order of priority for the sustainment of Hazmat Team 2:

- Calibration Gas, Sensors, & Maintenance:*

The calibration gases are necessary for the regular calibration and bump testing of the multi-gas meters. It is recommended that these meters be calibrated every 30 days and that a bump test be conducted prior to each use. Currently our gas meters have reached an age that the sensors are out of warranty and are going bad regularly. The cost of the sensors vary greatly depending on the type of sensor and the type of meter for which it is used. The meters are now using electrochemical sensors which are more than double the cost of the sensors used in the older gas meters. The requested funding for sensors reflects the yearly cost we are experiencing to maintain our gas meters in a ready condition. Due to aging of current gas meters, we are experiencing some higher than normal failures. The failures require service and maintenance from factory repair facilities at large costs, due to the integrity and certification process needed to maintain these meters from the factory.

- Remote Gas Monitoring Equipment with PID:*

In the ongoing effort to maintain our aging remote gas monitors, we are requesting to continue the upgrade effort. The remote gas monitoring equipment will allow us to maintain remote gas monitoring capabilities. We currently utilize AreaRae meters for this function. However, our current units are aging and require constant repairs. Rae Systems has now discontinued support of the older AreaRae meters that we currently have in service. Two of our current AreaRae meters have already been removed from service due to the lack of manufacturer support for needed repairs. Manufacturer's support has ceased with sensor, maintenance, and software upgrades stopping since November 2019. Stock inventory for parts and sensors are no longer available. With the steep cost of replacement, it is critical that we continue with immediate replacement of these units. Remote monitoring capabilities are critical to our mission and the safety of our personnel. Utilized not only during emergency response, remote gas monitoring is also a critical instrument during special events, such as the recent presidential and vice-presidential visits, to ensure the safety of the public. We are requesting to purchase two remote gas monitoring instruments. These two units will allow us to maintain remote monitoring capabilities and plume modeling. Additional units will be needed in the near future since our current AreaRae Cache will continue to diminish and be removed from service.
